

WIRED Security Inc.

# Executive Partner Summary

Prepared For:  
DriveSavers Data Recovery

Q1 - 2024

# Information Security Assessment

External 2024 Security Risk Assessment

Executive Partner Summary

Date: March, 2024

## Performed by: WIRED Security Incorporated

**DriveSavers Data Recovery** engaged **WIRED Security Incorporated** to provide an independent information security assessment including a penetration security test. The scope of this engagement included gathering information and reporting the findings based on network-based scanning, vulnerability testing and insight provided by **DriveSavers Data Recovery**.

Security best practices were used to conduct the audit, and to measure the effectiveness of the current **DriveSavers Data Recovery** information security program and technology infrastructure. Performing the security assessment, the team tests the organization's computer systems and network to identify potential vulnerabilities. All findings are recorded for further analysis and risk triage.

The security assessment team deployed automated tools to determine security control gaps. Manual verification was performed to eliminate false positives, expanding the testing scope when required, and discovery/documentation of the information flow in and out of the client's computing environment.

### Approach

- Perform broad security testing identify potential areas of exposure
- Perform targeted security testing and manual investigation to validate vulnerabilities
- Identify and validate vulnerabilities
- Rank vulnerabilities based on threat level, loss potential, and likelihood of exploitation
- Develop long-term recommendations to enhance security controls
- Transfer knowledge to stakeholders

### Executive Summary Conclusion

The **DriveSavers Data Recovery** computing environment (as included in the assessment scope), demonstrated throughout our security audit and penetration testing, to provide adequate defense against cyber threats. **WIRED Security** endorses that the **DriveSavers Data Recovery** computing environment provides reasonable assurances for data protection.
